Being Part of the Progress

We care

We act with integrity, respecting people, society and the planet. We take responsibility to create a safe, inclusive and trusting environment for everyone.

We collaborate

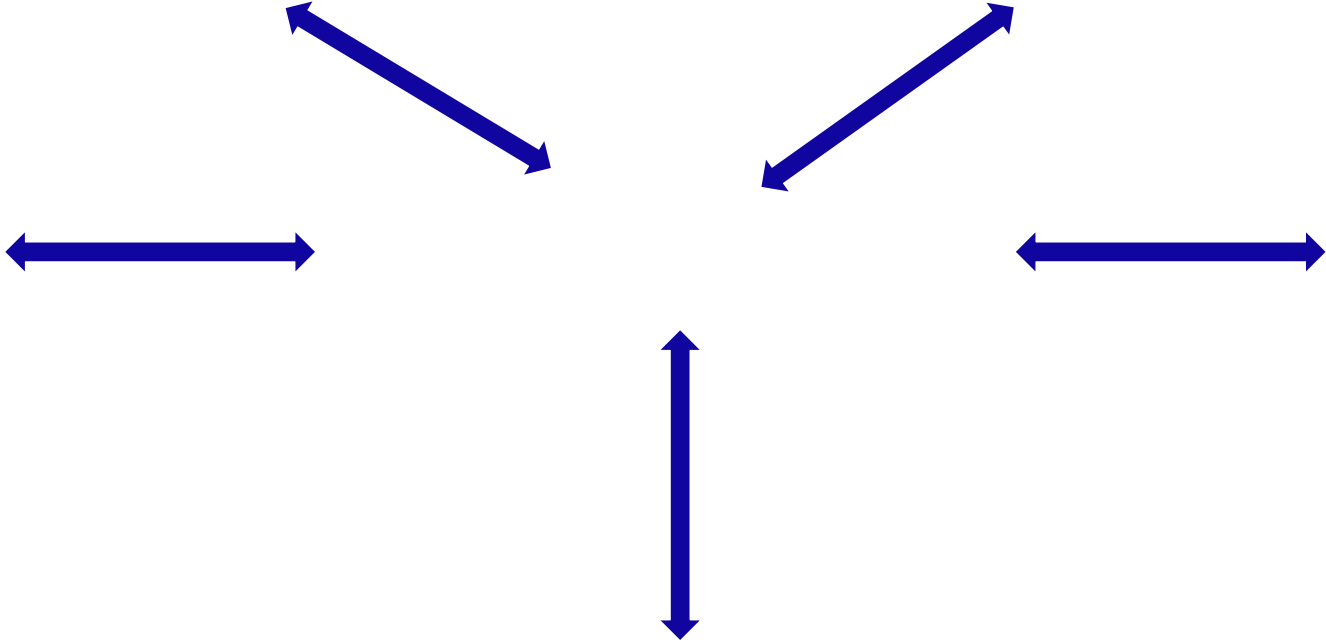

We collaborate to tap into our collective potential. We work together with our stakeholders to create the best solutions for ASML as a whole.

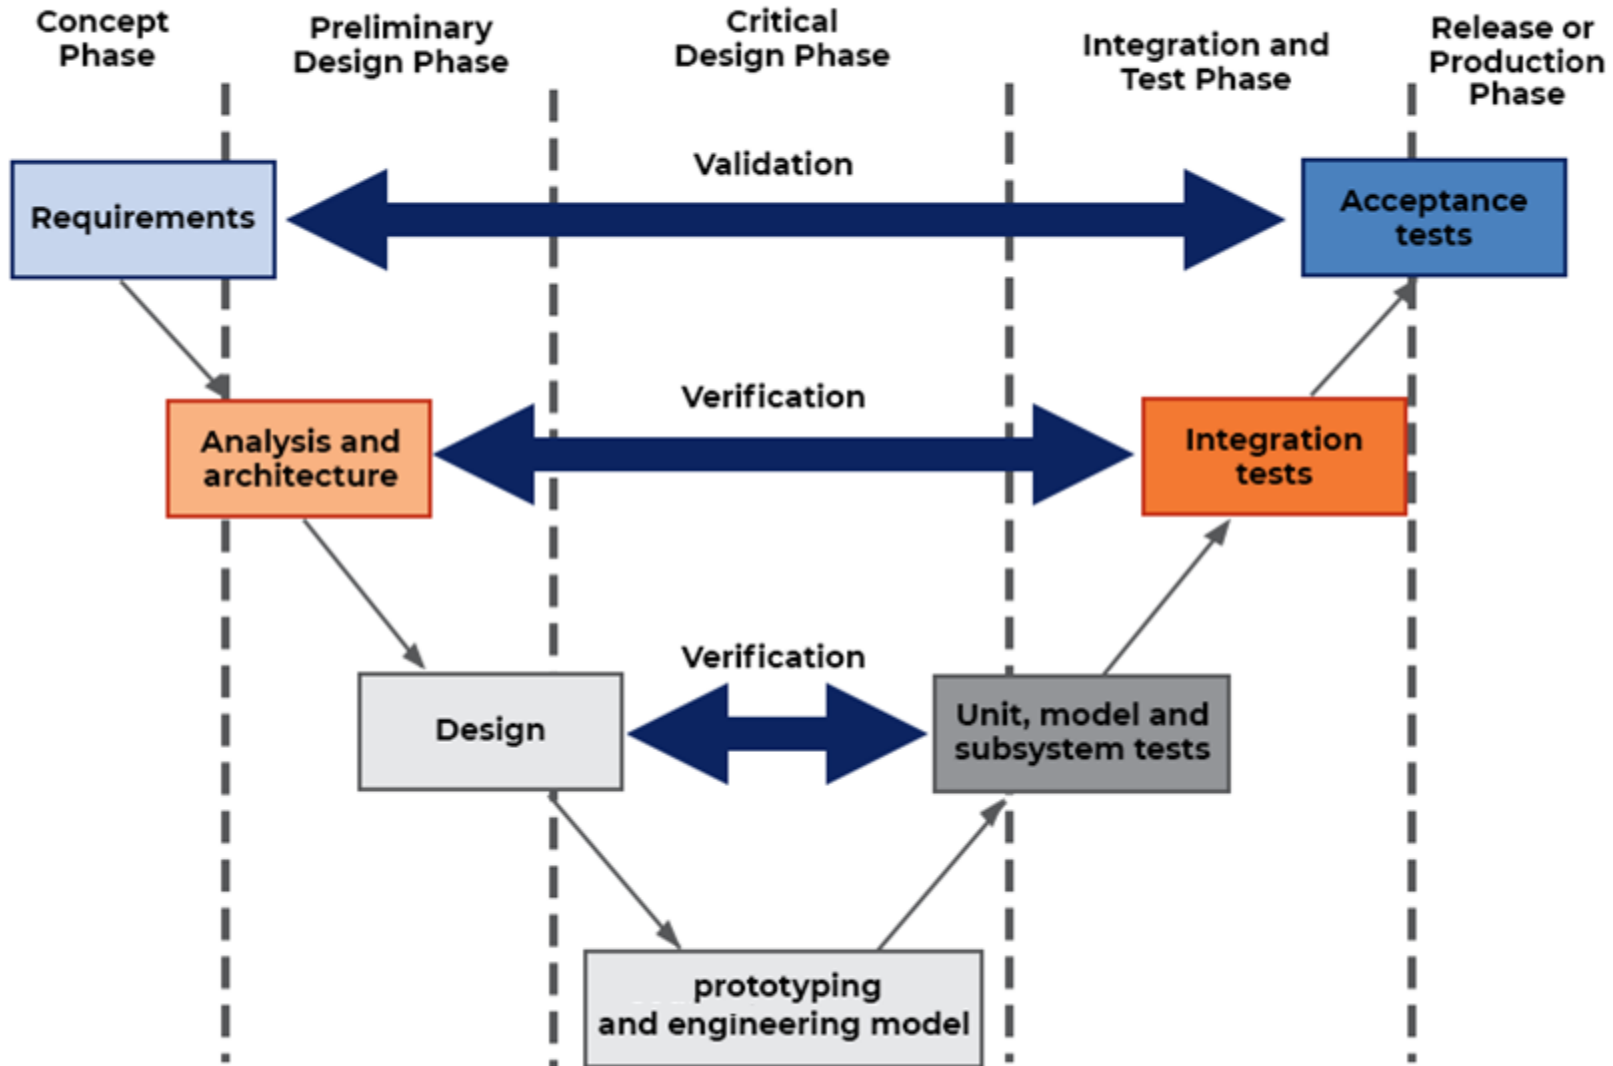

We challenge

Say it can't be done, we dare you. We eagerly refine our ideas and processes, pushing technology and results to new limits.

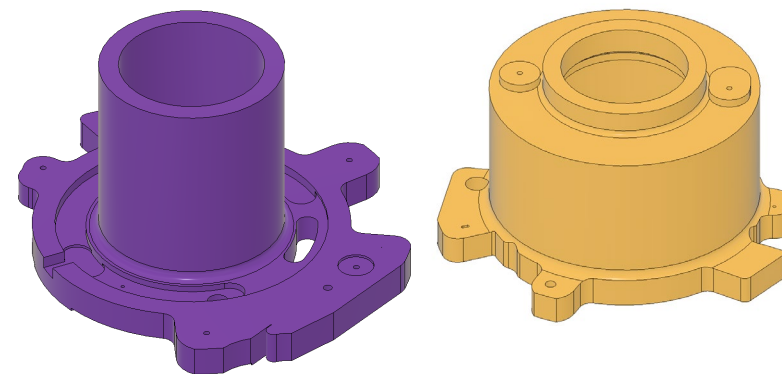

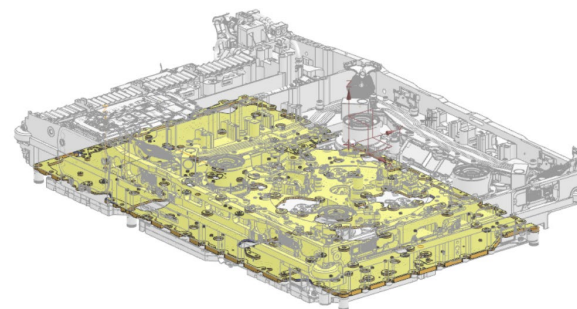

How to manufacture?

Defectivity, cost, performance, availability...

How to measure?

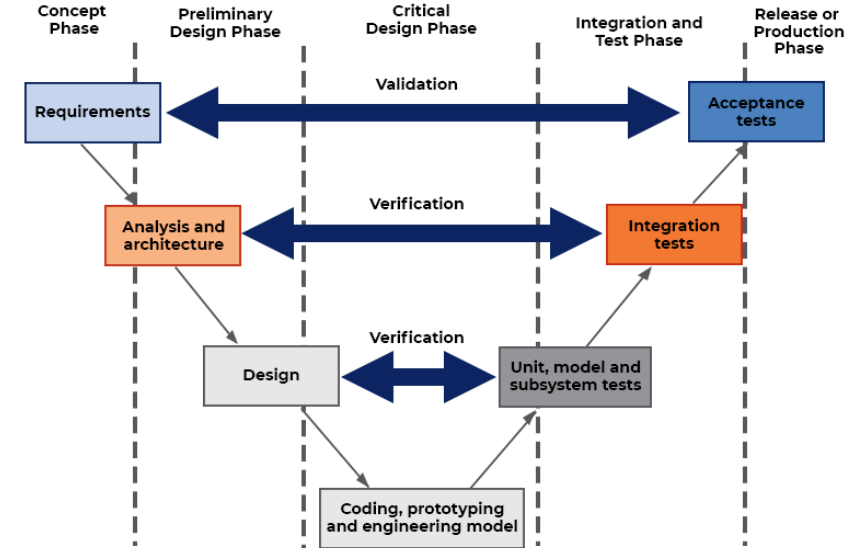

Jigs, # of measurements, how to measure in detail?

Challenge

Pro-active Communication

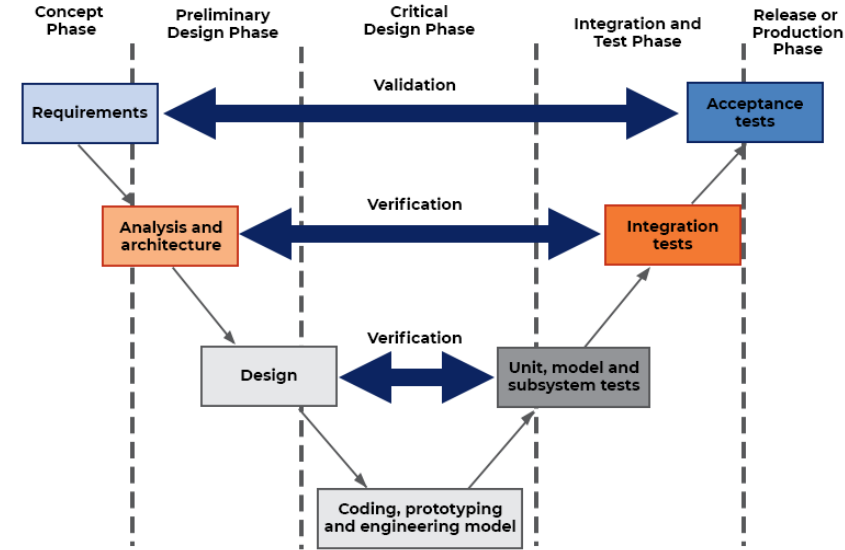

Requirements, Materials, Processes...

Knowledge Sharing!

Expertise, From feasibility phase to series production...

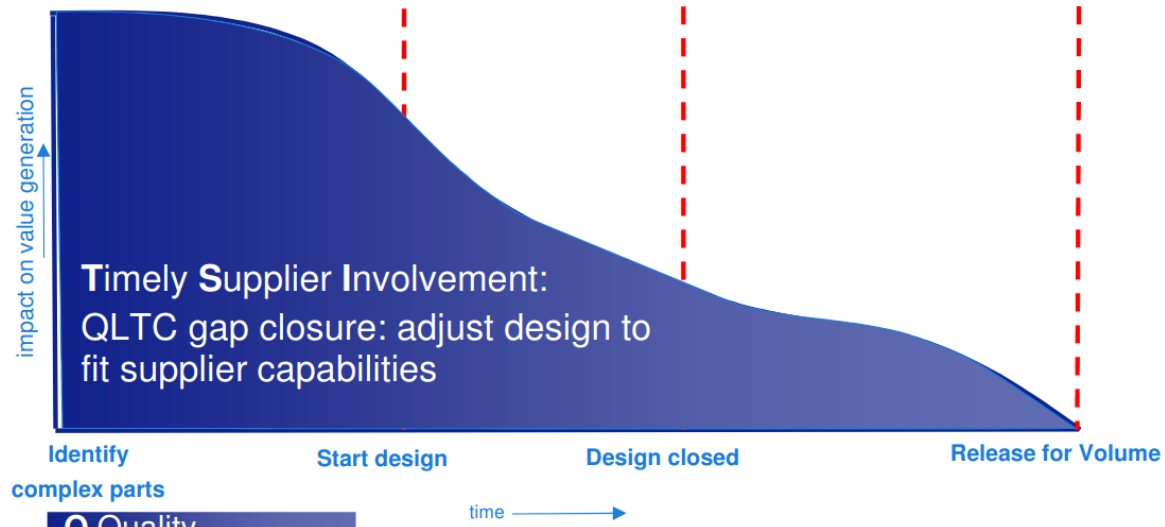

We enable each other to make it together!

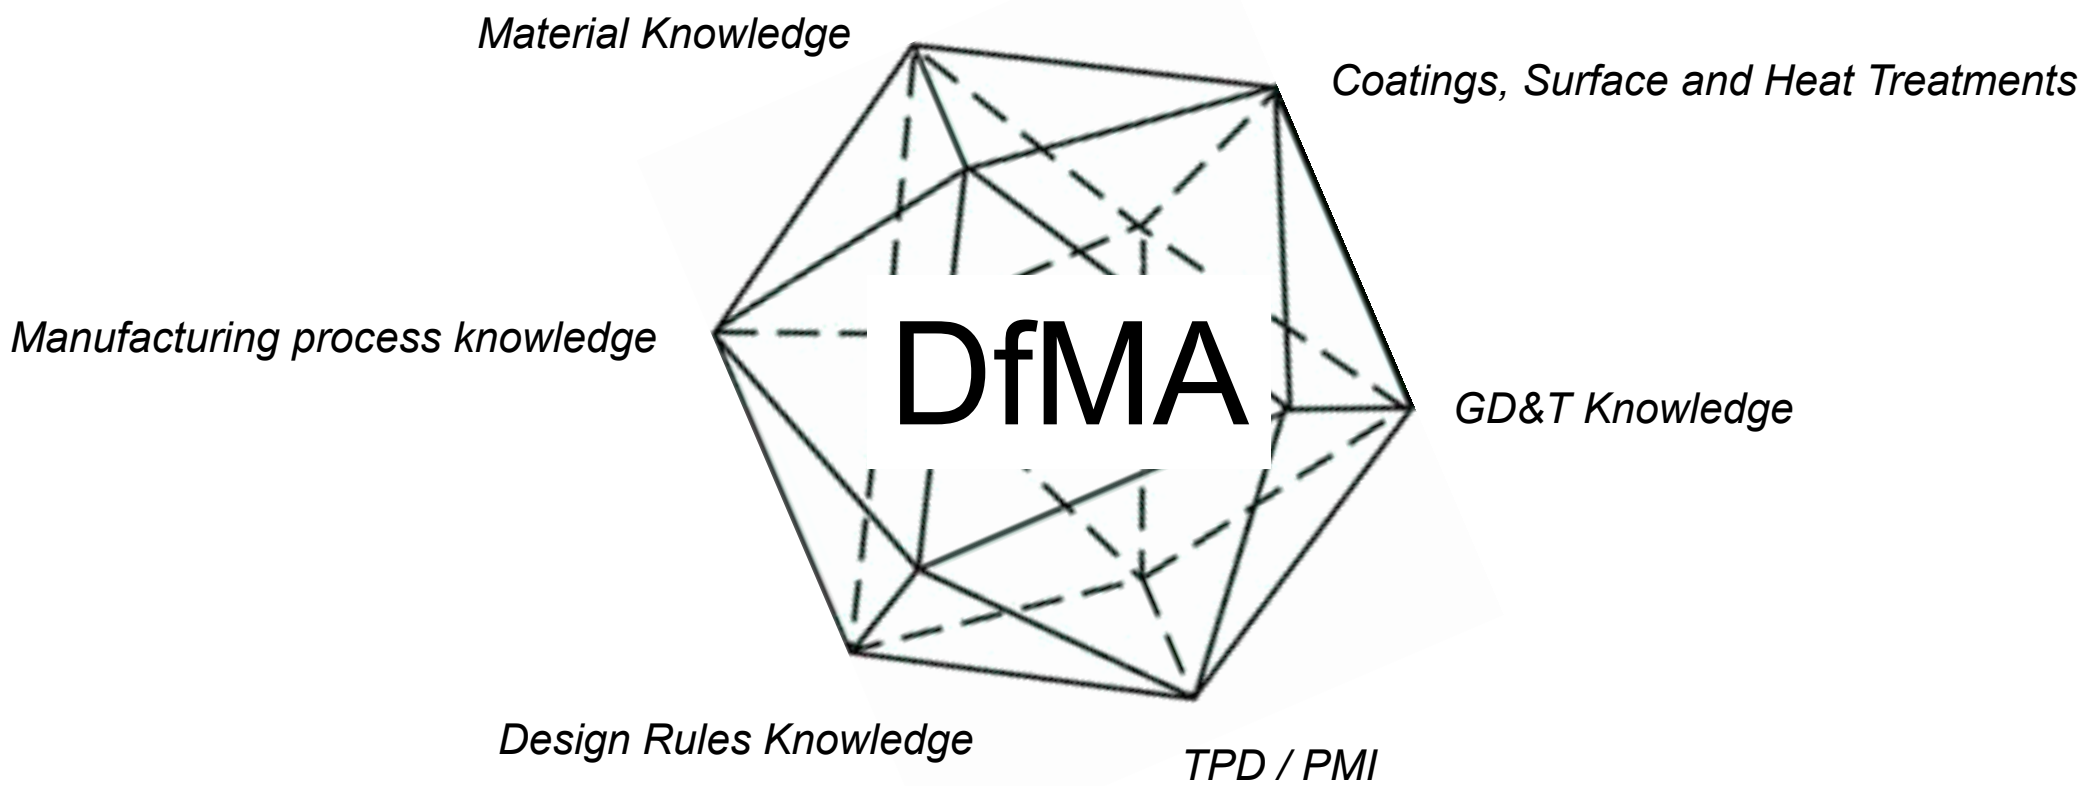

8D reporting, TPD Maintenance, DNs, MNs, Lessons Learned

Everyone does his job at his best!

We are on the same side, on the same boat!

- Q** Quality
- L** Logistics
- T** Technology
- C** total Costs

Thank You!

*"Alone we can do so little;
together we can do so much..."*

ASML
